T-400: Three Features

1

Ultra-high-accuracy machine translation with a 95% accuracy

- Rozetta's own AI translation using neural networks, which translates with accuracy comparable to that of a professional translator.

- Field of response

Legal, pharmaceutical, financial, chemical, IT, machinery and electronics

2

Your in-house terminology is automatically reflected in translation results.

- Register past translated sentences in your proprietary database.

- The sentence automatically analyzes the word and phrase of your company and reflects the results of the next translation.

3

Support Word • Excel, PPT, and PDF files

- Upload files as is and download translation results

- PDF can also be read with character recognition

World with 95% translation accuracy

1 English-language informations can be understood only by reading the translated Japanese language.

As a result,

- The time it takes to read the English literature is zero.
(Same as reading Japanese literature)
- You do not need to ask the translation company to translate English Japanese.

2 The English translation in Japanese can be completed only with a correction of around 10% of the sentence.

As a result,

- The time spent in translating Japanese into English is only one tenth of the time spent.

Compatible with various file formats

Supports Word files, Excel files, PowerPoint files, and PDFs!

- Upload the file as it is,
The translation results can be downloaded.
- It can be translated while keeping the manuscript layout, such as graphs and drawings.
- Only enter the URL of the Web site for machine translation.
- PDF recognizes texts and allows machine translation.
